

DHI-EVS7124D Embedded Video Storage

System Overview

DHI-EVS7124D offers unparalleled storage technology. It is designed and developed to meet the needs of medium-range to high-end IP video surveillance applications. It supports 512 channels of IP camera inputs, and 1024Mbps incoming/recording/forwarding bandwidth.

Combined with hot-swap power supplies, fans and hard disk drives, the EVS offers real Enterprise Class availability. The EVS supports dualcontroller Active-Active mode, ensuring no video loss during main-sub switch.This EVS is ideal for a wide range of applications such as public safety, transportation stations, government institutions, hotel resorts, shopping malls, city centers, and financial institutions, where demand expansion flexibility, high reliability and centralized storage management. This EVS is compatible with numerous third-party devices making it the perfect solution for surveillance systems with or without a video management system (VMS). Its open architecture supports multi-user access and is compatible with ONVIF 2.4.

Functions

Modular Design

All key modules are hot-swap and redundant configuration. Redundant fans, redundant power, and multi-redundant design ensure stability. The brand new design for disk carrier ensures good cooling, stability and safety for hard disks.

- · Dual-controller, Active-Active
- · 64-bit High-performance multi-core processor
- Max 512-ch IP camera inputs
- Max 1024 Mbps incoming/recording/forwarding bandwidth
- 24 HDDs, SAS, Hot-Swap
- Supports RAID 0/1/5/6/10/50/60, JBOD, Hot spare
- Supports video stream/ Picture direct storage mode and IPSAN storage mode
- · Supports Automatic Network Replenishment (ANR)
- · SAS cascade for expanded storage space
- Modular and drawer-like design
- 1+1 redundant 80PLUS platinum power supply
- · BBU battery (Optional) for abnormal power failure

Storage Extension Capacity

Local extension, connecting to expansion storage cabinet by mini SAS interface. Extension storage supports redundant power and RAID.

RAID 0/1/5/6/10/50/60

Offering a balance between storage performance, storage capacity, and data integrity, the EVS features fruitful RAID 0/1/5/6/10/50/60 for faster and safer recording.

Dual-controller Hot Standby

There is a main controller and a standby controller (hardware redundancy). The standby controller is always active, and will automatically take over the business when the main controller goes wrong.

In the Active-Active mode, after standby-controller real-time transmission service is enabled, the standby server pulls streams and there is no video loss during main-sub switch.

ANR (Automatic Network Replenishment Technology)

Video is recorded in SD card in IP cameras when the network breaks down, and after the network is recovered, the video will be transferred to EVS and then recorded on it.

EVS7 Series | DHI-EVS7124D

Technical Specification

System

System				
Main Processor	64-bit multi-core processor			
Operating System	Embedded Linux			
Operation Interface	Web			
Controller	Dual-controller			
RAM (Single Controller)	16 GB by default (extendable to 64 GB)			
Power Redundancy	1+1			
External Ports				
SAS(Single Controller)	2 mini SAS HD ports with maximum speed 12Gb/s			
Network (Single Controller)	1×1GbE management port; 4×1GbE LAN ports			
Network Extension (Single Controller)	4×1-GbE LAN ports; 2×10-GbE optical fiber ports			
eSATA(Single Controller)	1×eSATA			
RS-232(Single Controller)	1×DB9			
HDMI(Single Controller)	1×HDMI			
Internal Expansion				
M.2 SSD(Single Controller)	2×NVMe SSD ports			
PCI-E(Single Controller)	1×PCI-E X8; 1×PCI-E X4			
Disk(Single Controller)	1×2.5 inch SATA			
Disk				
Disk Bay	24			
Disk Type	1TB; 2TB; 3TB; 4TB; 5TB; 6TB; 8TB; 10TB; 12TB; 14TB; 16TB; 2.5-inch and 3.5-inch HDD Support simultaneously connecting to SAS/SSD			
Disk Installation	Independent disk tray			
Hot Swapping	Support			
RAID Type	RAID0, 1, 5, 6, 10, 50, 60, JBOD, Hot-Spare			
Disk Processing	Dad sector mapping			
Disk Management	Non-working disks automatic sleep			
Disk Inspection	Inspection before use and during use			
Performance				
Video Direct Storage (Private Protocol)	Up to 512-channel (1024 Mbps) access, storage, and forwarding; 32-channel (64 Mbps) online playback			
Video Direct Storage (ONVIF)	Up to 512-channel (1024 Mbps) access, storage, and forwarding; 32-channel (64 Mbps) online playback			
Video Direct Storage (Auto Register)	Up to 512-channel (1024 Mbps) access, storage, and forwarding; 32-channel (64 Mbps) online playback			
Picture Direct Storage	Up to 512-channel access, storage, and forwarding (250 KB/Picture)			
IPSAN Performance	Write-through: 900 Mbps Write-back: 1200 Mbps			

Function

Function		
IPSAN Mode	Yes	
IPSAN Function	Dynamic online extension of logic volumes	
Video Storage	Direct storage	
Network Protocol	RTP; RTCP; RTSP; UDP; HTTP; NTP; SNMP; iSCSI	
RTSP	ONVIF; GB28181	
Controller Mode	Dual-controller, active-active	
Automatic Network Replenishment (ANR)	Videos during network failure upload to EVS automatically afterwards	
Network Mode	Link aggregation, fault tolerance	
Quick RAID	Yes	
RAID Instant Use	Yes	
RAID Rebuilding	Self-adaptive rebuilding	
RAID-write Synchronization	Yes	
Record Mode	Scheduled, manual, motion-triggered and alarm triggered	
Video Playback	Web playback, concentrated playback, slice playback, synchronous playback Search video by second Adjustable playback speed	
Video Codec	Access by cameras with encoding formats of MPEG4, MJPEG, H.264, H.265, and SVAC Access by multi-sensor cameras, thermal cameras, and panoramic cameras	
Video Backup	Back up video through USB, network, and eSATA	
Video Backup General	Back up video through USB, network, and eSATA	
	Back up video through USB, network, and eSATA 100–127V/200–240V AC, 50/60Hz, 5A/2.5A
