

## **Dahua Mobile Dome Network Camera**

### **Quick Start Guide**

**Version 1.0.0**

**ZHEJIANG DAHUA VISION TECHNOLOGY CO., LTD**

## Welcome

Thank you for purchasing our Network camera!

This user's manual is designed to be a reference tool for your system.

Please read the following safeguard and warnings carefully before you use this series product!

Please keep this user's manual well for future reference!

## Important Safeguards and Warnings

### 1 . Electrical safety

- All installation and operation here should conform to your local electrical safety codes.
- Please check if the power supply is correct before operating the device.
- The power shall conform to the requirement in the SELV (Safety Extra Low Voltage) and the Limited power source is rated DC 12V or AC 24V in the IEC60950-1. (Power supply requirement is subject to the device label).
- Please install easy-to-use device for power off before installing wiring, which is for emergent power off when necessary.
- Please prevent the line cord from being trampled or pressed, especially the plug, power socket and the junction from the device.
- Do not connect these two power supplying sources to the device at the same time; it may result in device damage!
- We assume no liability or responsibility for all the fires or electrical shock caused by improper handling or installation.
- We are not liable for any problems caused by unauthorized modification or attempted repair.

### 2 . Environment

- Please don't aim the device at strong light (such as lighting, sunlight and so on) to focus; otherwise it may cause overexposure (It is not the device malfunction), which will affect the longevity of CCD or CMOS.
- Please transport, use and store the device within the range of allowed humidity and temperature.
- Please don't keep the device in a place which is wet, dusty, extremely hot, and extremely cold and with strong electromagnetic radiation or unstable lighting.
- Please do not allow water and other liquid falling into the camera in case that the internal components are damaged.
- Please do not allow rain or damp to the indoor device in case fire or lightning may occur.
- Please keep the sound ventilation in case of heat accumulation.
- Please pack the device with standard factory packaging or material with same quality when transporting the device.
- Heavy stress, violent vibration or water splash are not allowed during transportation, storage and installation.

### 3. Operation and Daily Maintenance

- Please do not touch the heat dissipation component of the device directly in order to avoid scald.
- Please do not dismantle the device; there is no component which can be fixed by users themselves in the machine. It may cause water leakage or bad image for the device due to unprofessional dismantling. Please contact after-sale service to replace desiccant if it becomes green.
- It is recommended to use the device with thunder proof device in order to improve thunder proof effect.
- The grounding holes of the product are recommended to be grounded to further enhance the reliability of the camera.
- Do not touch the CCD (CMOS) optic component directly. You can use the blower to clean the dust or dirt on the lens surface. Please use a dry cloth wetted by alcohol to wipe away the dust gently if it is necessary to clean.
- Always use the dry soft cloth to clean the device. If there is too much dust, please use the water to dilute the mild detergent first and then use it to clean the device. Finally use the dry cloth to clean the device. Don't use volatile solvent like alcohol, benzene, thinner and etc or strong detergent with abrasiveness, otherwise it will damage the surface coating or reduce the working performance of the device.
- Dome cover is an optical device, please don't touch or wipe cover surface directly during installation and use, please refer to the following methods to deal with once dirt is found:
  - Stained with dirt
  - Use oil-free soft brush or hair dries to remove it gently.
  - Stained with grease or fingerprint
  - Use soft cloth to wipe the water drop or oil gently to make it dry, then use oil-free cotton cloth or paper soaked with alcohol or detergent to wipe from the lens center to outward. It is ok to change the cloth and wipe several times if it is not clean enough.

### Warning

- Please modify the default password after login in order to avoid being stolen.
- Please use the standard accessories provided by manufacturer and make sure the device is installed and fixed by professional engineers.
- Please prevent the device surface from the radiation of laser beam when using laser beam device.
- Please do not provide two or more power supply modes for the device, otherwise it may cause damage to the device.

### Statement

- Please refer to the actual product for more details; the manual is just for reference.
- The manual will be regularly upgraded according to the product update; the upgraded content will be added in the manual without prior announcement.
- Please contact the supplier or customer service if there is any problem occurred when using the device.

## Dahua Mobile Dome Network Camera Quick Start Guide

- Please contact the customer service for the latest procedure and supplementary documentation.
- There may be deviation between the actual value of some data and the value provided in the manual due to the reasons such as the real environment is not stable and so on. Please refer to the company's final explanation if there is any doubt or dispute.
- The company is not liable for any loss caused by the operation which is not followed by the manual.

### FCC Information

#### 1. FCC conditions:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference;
- This device must accept any interference received, including interference that may cause undesired operation.

#### 2. FCC compliance:

This equipment has been tested and found to comply with the limits for a digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### Note

Please refer to the disk for more details, check and download corresponding user's manual and tool.

Before installation, please open the package and check all the components are included.

Contact your local retailer ASAP if something is broken in your package.

## 1 Device Structure

### 1.1 Device External Cable

#### Note

- The following figure is for reference only.
- There are differences about cable between different models, please refer to the actual product for more details.

You can refer to the following figure for cable information. See Figure 1-1.

Figure 1-1

Please refer to Table 1-1 for detailed information.

SN	Name
①	Connector
②	Cable

Table 1-1

### 1.2 Framework and Dimension

#### Note

The following figure is for reference only, which is used to know the device dimension.

Please refer to the following figure for dimension information. The unit is mm (inch). See Figure 1-2.

Figure 1-2

## 2 Device Installation

### 2.1 Install SD Card (Optional)

#### Note

- Please implement SD card installation when the device is equipped with SD card slot and it needs to use SD card.
- Please cut off the device power before installing SD card.

#### Step 1

You can see Micro SD card slot after you open the lower cover.

#### Step 2

Insert the Micro SD card into the slot which is shown in Figure 2-1, you can press the Micro SD card slightly to insert it because the card slot is elastic.

Figure 2-1

#### Step 3

Install the lower cover back to place.

### 2.2 Fix Device

#### Note

- Please cut off the device power before installing Micro SD card.
- Please make sure the mounting surface can support at least 3X weight of the camera.

Figure 2-2

**Step 1**

Rotate the decoration cover out of place and take out the decoration cover and compression cover.

**Step 2**

Lead the cable into the cable outlet hole on the mounting surface.

**Step 3**

Use self-tapping screws to fix the pedestal on the mounting surface.

**Step 4**

Install the compression cover back to the device and rotate the decoration cover into the pedestal after adjusting the device angle.

## 2.3 Adjust Device Angle

You can adjust the dome body lens according to the monitoring range before rotating the decoration cover, and then tighten the decoration cover firmly. Please refer to Figure 2-3 for the lens adjustment direction.

Figure 2-3

### 3 Network Configuration

You can initialize the device and modify IP address via "Quick Configuration Tool"; you can also initialize device and modify IP address on the WEB interface. Please refer to the *WEB Operation Manual* in the disk for more details.

#### Note

- It needs to implement initialization if it is the first time use device or the device is restored to factory default. Only some device support initialization function.
- It can implement initialization only when the device IP address (192.168.1.108 by default) and the IP address of PC are in the same network segment.
- In order to make the camera have access to network smoothly, please plan available IP segment according to the actual network environment.
- The following figures are for reference only; different models may have different interfaces.

#### 3.1 Device Initialization

##### Step 1

Double click "ConfigTool.exe" and open quick config tool.

##### Step 2

Click  to enter the interface where you can modify IP address, click **Search Setting**, the system will display the **Setting** dialog box.

##### Step 3

Set the device network segment, login user name and password, and then click **OK**. The system will display the searched devices after searching completes.

##### Step 4

Select the devices which need initialization and click **Initialization**. The system will display the interface of **Device Initialization**, which is shown in Figure 2-4.

Device Initialization

×

2 unit(s) of device have not been initialized

Username

admin

New Password

WeakMediumStrong

Confirm Password

The password shall be 8-32 digits. It is a combination of number(s),letter(s),symbol(s) with at least two kinds of them.

☒

Email Address

(for password reset)

After you have set new password, please set password again in Search Setup.

Initialize

Figure 2-4

### Step 5

Set new password and confirm password, select **Email Address** and input email address.

### Note

The password can be set as 8 to 32 characters; it can be a combination of number(s), letter(s) and symbol(s) with at least two kinds of them (excluding “ ”, “ ”, “ ”, “ ”, “ ”, “ ”). Please set password with high security according to the password strong and weak prompt.

### Step 6

Click **Initialization**, the system begins to initialize the device.

✔ means initialization succeeded; ⚠ means initialization failed. Click the icon to check more details.

### Step 7

Click **OK** to complete device initialization.

### 3.2 Modify IP Address

### Step 1

Double click "ConfigTool.exe" and open quick config tool.

### Step 2

Click  to enter the interface where you can modify IP address, click **Search Setting**, the system will display the **Setting** dialog box.

### Step 3

Set the device network segment, login user name and password, and then click **OK**. The system will display the searched devices after searching completes.

## Step 4

Select the devices whose IP addresses need to be modified, and then click .

The system will display the dialog box of Modify IP Address, which is shown in Figure 2-5.

Figure 2-5

## Step 5

Set the mode as **Static**, and enter the planned start IP, subnet mask and gateway.

### Note

Set the mode as **DHCP** when there is DHCP server in the network, the device will automatically acquire IP address from the DHCP server.

## Step 6

Click **OK** to complete modification of device IP address.

## 3.3 Login WEB Interface

### Step 1

Open IE browser, enter the modified camera IP address into the address bar and then press **Enter** button. Please operate according to the interface prompt if the interface displays guide of **Software License Agreement** and **Online Upgrade**.

### Step 2

Enter username and password, click **Login**.

### Step 3

For the first login, click **Click Here to Download Plug-in**, install controls according to system prompt. The main interface will be shown in Figure 2-6 after control installation is completed.
