

Cloud Router Switch series

Setup Guide and Warranty Information

The CRS is a highly configurable switch, powered by RouterOS. It has 24 Gigabit ports. Three models currently available:

- CRS125-24G-1S-2HnD-IN (integrated wireless, indoor case)
- CRS125-24G-1S-IN (indoor case)
- CRS125-24G-1S-RM (rackmount case)

First use

The device comes preinstalled with RouterOS and is ready to use. Device is compatible with RouterOS v6 and newer, if your device comes preinstalled with an earlier version, please upgrade before using it.

The Ethernet ports 2-24 are switched, and the device can be accessed via these ports though the IP **192.168.88.1** username is **admin** and there is **no password**. Please connect with your web browser to this IP address to configure it. Ethernet port 1 is configured as a DHCP client and has firewall on it. The SFP port is configured the same way as Ether 1, with a firewall and DHCP client on it. The Ether1 port also supports PoE input (see below note), and can be used for Netinstall recovery mode.

Please note that for the wireless model, default wireless password is the same as unit serial number. You can check this on the sticker, serial number is 12 symbols long.

See this page for connection and configuration guides: <http://wiki.mikrotik.com/wiki/Category:Manual>

Powering

The device accepts powering in the following ways:

- Direct-input power jack: 10-28V (24V 0.8A PSU included)
- PoE input via passive PoE injector on Ether1 10-28V, PoE injector included (PoE support only where indicated on the label, earlier production units did not have PoE on Ether1, and hence did not have PoE indicated on the Ether1 label).

Extension Slots and Ports

- Twenty four (24) 10/100/1000 (Gigabit) Ethernet ports (Auto MDI/X)
- One SFP cage, compatible with 1.25G SFP modules
- *Only CRS125-24G-1S-2HnD-IN: Built in 802.11b/g/n 2GHz wireless access point*

Resetting the device

In case you wish to return the device to its original configuration, you can use the RESET button. Hold this button during boot time until LED lights start flashing, then release the button to **reset RouterOS configuration**. You can use this procedure if you have forgotten the password to access the device, or simply wish to return the unit to its default configuration state.

Buttons and Jumpers

- RouterBOOT reset button (image Reset1) has several functions:
 - ✓ Hold the button before powering on the device, and at power up, the button will force load the backup boot loader. Continue holding the button for the other two functions of this button:
 - ✓ Release the button when green LED starts flashing, to reset RouterOS configuration. To not load backup boot loader, you can start holding the button after power is already applied
 - ✓ Release the button after LED is no longer flashing (~20 seconds) to cause device to look for Netinstall servers on Ether 1 port (required for reinstalling RouterOS over network)
- RouterOS reset jumper hole (image Reset2): **resets RouterOS** software to defaults. Hold screwdriver pressed to this reset hole, and boot the device. Hold screwdriver in place until RouterOS configuration is cleared (10 seconds).

Operating System Support

Currently tested operating system is MikroTik RouterOS (starting from version 6).

Safety Notice

Electric shock hazard. This equipment is to be serviced by trained personnel only.

Warranty

Copyright and Trademarks. Copyright MikroTik SIA. This manual contains information protected by copyright law. No part of it may be reproduced or transmitted in any form without prior written permission from the copyright holder. RouterBOARD, RouterOS, RouterBOOT and MikroTik are trademarks of MikroTik SIA. All trademarks and registered trademarks appearing in this manual are the property of their respective holders.

Hardware. MikroTik warrants all RouterBOARD series equipment for the term of twelve (12) months from the shipping date to be free of defects in materials and workmanship under normal use and service, except in case of damage caused by mechanical, electrical or other accidental or intended damages caused by improper use or due to wind, rain, fire or other acts of nature.

To return failed units to MikroTik, you must perform the following RMA (Return Merchandise Authorization) procedure. Follow the instructions below to save time, efforts, avoid costs, and improve the speed of the RMA process.

1. If you have purchased your product from a MikroTik Reseller, please contact the Reseller company regarding all warranty and repair issues, the following instructions apply **ONLY** if you purchased your equipment directly from MikroTik in Latvia.
2. We do not offer repairs for products that are not covered by warranty. Exceptions can be made for RB1000, RB1100 and RB1200, CCR, CRS.
3. Out-of-warranty devices and devices not covered by warranty sent to MikroTik will be returned to the sender at sender's cost.

RMA Instructions are located on our webpage here: <http://rma.mikrotik.com>
