Description

HRui 17 ports POE Switch, Adapted high-quality high-speed network IC and the most stable POE chip, POE port to meet the 802.3af or 802.3at standard, this series of POE switches can be 10/100M Ethernet Network provides seamless connection, and POE power supply port can automatically detect IEEE802.3af or IEEE802.3at compliant power supply equipment and its power supply,Only transmit data for non-POE equipment .

POE technology (Power over Ethernet) , it refers to some IP-based terminals (such as IP telephones, wireless access AP, network cameras, etc.) while transmitting data signals, but also for the device to provide DC power supply Technology, which receive DC power supply equipment called power receiving equipment.

This series of POE switches, using 14 POE ports + 3 uplink Gigabit Ethernet port, the uplink port is to connect with the network equipment which provide data.
